University of Missouri-Columbia

Endowment Honors Stan Botner

For many alumni, Stan Botner embodied the MPA program. Long-time professor and chair of the department, Dr. Botner was an outstanding teacher and scholar. In addition to his many professional accomplishments, he made a real difference in the lives of his students by being a caring and supportive mentor. For many students, Stan's personal generosity made it possible for them to stay in school and complete the program.

In recognition of his many contributions to the MPA Program and its students, the Truman School

has long given the Botner Award to an outstanding student. Now, thanks to a generous gift from MPA alum James D. (Denny) Shelton (MPA class of 1977), an endowment has been created to honor Stan Botner. When fully funded, the Botner endowment will provide an annual scholarship covering all instructional costs for an entering MPA student.

Former students and friends of Stan Botner may also contribute to the endowment. For more information, contact Bart Wechsler at wechslerb@missouri.edu or 573-882-3304.

*"I would much rather be an honorable public servant and known as such than to be the richest man in the world."
– Harry S Truman*

AMPAS Gets Hands On With Local Charities

Winter 2004 was a busy semester for the Association of MPA students (AMPAS). Members participated in a variety of community service projects. The largest project was the Big Brothers Big Sisters Bowl for Kids Sake. AMPAS raised almost \$2000 in pledges and had a great time bowling.

AMPAS members also volunteered with local charitable organizations. In February, AMPAS volunteers prepared and served dinner at the St. Francis House, a small homeless shelter in Columbia. In March, they prepared dinner for the families at the Ronald McDonald House.

Most recently, AMPAS members helped build a house with the local chapter of Habitat for Humanity. Although it was a rainy day, volunteers painted walls, ceilings, and doors, and had a little extra fun using power tools. The house they worked on is now complete, and AMPAS members plan to work on another Habitat house next year.

All of the projects were very successful and AMPAS members hope to repeat most of them. While AMPAS hasn't finalized plans for service projects for the new semester, the organization will continue to focus its energy and efforts on Columbia's charitable organizations.

Dr. Bart Wechsler
Director of the
Harry S Truman
School of Public
Affairs

From the Director

We begin the new academic year at the Truman School with feelings of both pride and hope. We are, I think, rightfully proud of the accomplishments of our faculty, students, and alumni and the progress we have made in building this still young institution. And, s looking to the future, we see very bright prospects.

During this past summer, faculty and staff devoted many hours to preparing the Self-Study which accompanied our application for continuing accreditation by the National Association of Schools of Public Affairs and Administration (NASPAA). I'm pleased to report that the final document was sent off to NASPAA well ahead of their deadline. As important as accreditation in itself, however, the greatest benefit came from what we learned about the program through the eyes of our most important constituents, students and alumni.

As part of our Self-Study, we surveyed MPA alumni going back to the 1970s. Respondents came from a cross-section of the School's alumni and represent an interesting picture of public service in the 21st century.

As you might expect, Truman School Alumni are employed across the public, non-profit, and private sectors. While state government remains the largest employer, only 37% of alumni are state employees. Federal and local governments employ another 21%, leaving more than 40% employed outside government. Non-profit agencies and NGOs, educational institutions, and private firms are the employers of growing numbers of alumni.

Happily, more than 80% of all respondents described themselves as satisfied or very satisfied with the overall direction of their careers, the level of responsibility they had achieved, the substantive content of their work, and the impact of their work in their field. Eighty-eight percent saw their MPA education as an important or extremely important factor in their professional success. Alumni were similarly positive about their MPA experience:

Eighty-eight percent of alumni saw their MPA education as an important or extremely important factor in their professional success.

96% reported that the MPA program provided a positive learning environment, 90% had a sense of pride in being a graduate of the program, and 92% said they would recommend the program to a prospective student. These findings are a source of satisfaction to the faculty and a reminder of the great history and tradition represented by the MPA at MU.

Building on this tradition of success, the Truman School continues to make great progress. With the largest enrollment in our forty year history (just under 150 students on-campus and in Jefferson City) and a terrific entering class, we look forward to another outstanding year. Students come from Missouri, several neighboring states, the west and east coasts, and several foreign countries.

In addition to our new students, we have welcomed new faculty to Truman this fall. Dr. Jeffrey Milyo, associate professor of economics and public affairs, comes to us from the Harris School of Public Policy at the University of Chicago. Dr. Milyo will teach policy economics, health policy, and law and economics in TSPA and the Department of Economics.

Jill Nicholson-Crotty, a Ph.D. candidate at Texas A&M University, will be a visiting instructor this year, teaching New Governance, Research Methods, and Policy Strategies and Processes. Dr. Judith Stallman, Professor of Agricultural Economics and Community Development, has accepted a joint appointment in the Truman School and will teach Economics of Public Policy in Jefferson City.

Dr. Dennis Robinson has joined the Community Policy Analysis Center and the Truman School as a Research Associate Professor. He's also teaching two sections of Economics of Public Policy.

Finally, Brian Dobson, president of the Corporation for Enterprise Development joins us as Research Professor and Co-Director of the RUPRI Poverty Research Center.

Editor: Lori A. Riddle

Star Alum: Zim Schwartz

Captain Zim Schwartz is the East District Commander of the Columbia Missouri Police Department. Schwartz is the first female captain in the department's 105 year history. As East District Commander, Schwartz is one of five captains of the department. She manages patrol, traffic and canine units serving the east half of the city. She is in charge of about 65 people, roughly half of the department.

Being East District Commander requires Schwartz be on call 24 hours a day, seven days a week. She says a lot of her time is spent on the telephone, at community events, and attending neighborhood and business associations meetings with beat officers. She holds meetings with the East District Council, which is made up of 9-10 citizens that live in the East District. These citizens meet regularly with Schwartz to help her identify problem areas in their part of town such as speeding problems and thefts.

Schwartz says her job is much different now than when she first joined the Columbia Police Department as an officer 13 years ago. "My job now is to help steer the boat instead of row," Schwartz said. "For many years as an officer and a sergeant, I helped row. Now, I can help guide the direction where the department can and should go."

Schwartz comes from a family of engineers, and she earned a BA in Industrial Engineering from the University of Missouri before decided to join the police department. She earned her MPA from the Truman School in 2002. She began studying at the Truman School when she was promoted to sergeant. With her promotion, the police department offered a pay increase and funding for four courses on the graduate level to improve law enforcement management. Schwartz decided to take advantage of that opportunity, and then a few years later was able to arrange her work schedule in order to complete her degree.

"I think [the MPA Program] really helps you to be more well-rounded," said Schwartz. "It not only provides insight into our department, but also into the entire city operations."

Schwartz says her MPA education was very useful in specialty areas of the police force because the specialties often work in conjunction with other city agencies.

"It helps you look at the big picture, which is very helpful because we often work with other city agencies," said Schwartz. "It gives you the overall picture of city government."

Schwartz is also involved in the community outside the police department. She serves on the executive committee for the Central Missouri Humane Society and is involved with Special Olympics, the chosen charity of law enforcement nationwide. For more than 10 years, she has helped raise funds for the more than 14,000 Special Olympics Athletes in Missouri.

Expert on Iraq Reconstruction Delivers Lecture

On April 26, Ted Morse – a senior official with US Agency for International Development (USAID) delivered a 2004 Monroe-Paine Lecture on Iraq reconstruction in "Prospects and Problems in International Conflict Prevention". The event was co-sponsored by MU's Truman School of Public Affairs and the European Union Center.

Morse recently completed a tour of duty as Coordinator for the Coalition Provisional Authority, where he served as Mayor of Baghdad and Governor of Baghdad Province. In his lecture, Morse reflected on the deadly, difficult challenges faced by the CPA from May, 2003 to April, 2004, and lessons learned from his experience. He concluded that Iraqi insurgency is deeply-rooted and sustained. Nevertheless, he argued that the US must move as quickly as possible toward Iraqi sovereignty. Morse proposed much stronger efforts toward economic reconstruction, and more assistance and involvement from other countries in the region.

Morse joined the U.S. Agency for International Development in 1962, focusing on long-term economic and social development and security –

with extended assignments in Africa, Asia, Central America, Caribbean, the Balkans, and most recently, Iraq. In addition, he has worked on fourteen emergency relief and post-conflict reconstruction situations, including contra-aid, Grenada, Bosnia, Kosovo, Sierra Leone, and Iraq.

His "crisis management" experience led to his most recent assignment as the Coalition Provisional Authority (CPA) coordinator for Baghdad. It has also been the motivation for his work to install Conflict Prevention policies and programs within the U.S. Government inter-agency processes during his retirement. Morse earned a Bachelor's degree in Social Science at California State University at Sacramento and a Master's in International Development at George Washington University. He has two Presidential Distinguished and Meritorious Service Awards for directing contra-aid in 1988-90 and directing U.S. Government drought relief in Africa. He has received numerous awards from USAID, the Department of State, and the Defense Department for his distinguished service.

Featured Faculty Member

Dr. Jane Mosley

Dr. Jane Mosley earned her Ph.D. in Sociology from the University of Wisconsin-Madison. After completing her degree she went to work at the National Center for Children in Poverty at Columbia University.

She came to the Truman School of Public Affairs from the Midwest Research Institute in Kasas City, Missouri in March of 2002.

“After working at MRI, I was attracted to the idea of being back in a university setting,” Mosley said. “What I like best about TSPA is the value placed on applied work and public service, and the interdisciplinary nature of the school.”

Mosley’s research interests revolve around policies for low income families and children.

She has recently completed a project examining the relationship between private assistance through food pantires and public assistance through food stamps in the Kansas City metro area. Her research was funded by the Economic Research Service, United States Department of Agriculture. The work was published in the June issue of *Social Science Review*.

Mosley is also working with the Rural Poverty Research Center (RUPRI) to look at the geographic variation in material hardship, particularly between rural and urban areas.

Jane is married to Jeff Reinhardt and has a two year-old son, Spencer Reinhardt.

E-Governance Faculty, Students Examine MU Accessibility

One of the most pressing issues facing public decision makers is ensuring accessibility to public spaces, regardless of physical limitations. For more than a year, faculty and students of the Truman School’s E-Governance Specialization have been researching accessibility policy, punctuated by the completion of the first phase of an online accessibility inventory tool for the University of Missouri, known as the MU Campus Accessibility Tracking System (MUCATS). “The idea for MUCATS came about after we were approached by the University to update and modernize the existing accessibility maps,” said Chris Fulcher, TSPA assistant professor. “After that initial meeting, we began to devise a method that would not only inventory MU’s accessibility features, but provide a dynamic, updatable resource that could be accessed by anyone with a computer and Internet connection. Beyond that, this system is transferable to many other types of organizations that may want to track accessibility, such as other universities or the downtown districts of metropolitan areas.”

After MUCATS was approved, project staff visually confirmed every accessibility point on the MU campus, including automatic entrances, disabled parking spaces, elevators, and curb cuts. Bret Sanders, Truman School Research Specialist, notes “The primary data collection took place primarily during the summer of 2003. Using handheld computers, we were able to record attributes and take a digital photograph for every accessibility point on campus.” After the initial collection, project staff spot-checked the data for validity, entered the records into a large database, and built a publicly-accessible website. Yan Barnett, Senior Spatial Analyst at MU’s Center for Agricultural, Resource, and Environmental Systems (CARES) created an online mapping application to display the project data, and Tye Parsons, Truman School Graduate Research Assistant, designed the MUCATS website. The website allows campus visitors, students, and faculty to interactively view the accessibility points for any campus building or location on any computer.

The MUCATS website can be viewed at <http://ability.missouri.edu/mucats>. For more information about this project, contact Chris Fulcher at fulcherc@missouri.edu.

Volkan Delivers Monroe-Paine Lecture

Dr. Vamik D. Volkan

Vamik D. Volkan, M.D., founder of the Center for the Study of Mind and Human Interaction and Professor Emeritus of Psychiatry at the University of Virginia, School of Medicine, is author of *Bloodlines: From Ethnic Pride to Ethnic Terror* and most recently *Blind Trust: Large Groups and Their Leaders in Times of Crisis and Terror*. His Monroe-Paine Lecture in Public Affairs concluded several days of a conference co-sponsored by the Truman School of Public Affairs, the European Union Center, and the Center for the Study of Organizational Change, on “Human Security in the New Millennium.”

Dr. Volkan’s presentation focused on the societal consequences of vulnerability in a world of escalating tensions and terrorism. His talk pulled from his research on the subject of violence, terror, and conflict resolution. In particular, Volkan pointed out how polarizing leaders reignite passions and hatreds of the past by reawakening traumas of large groups (such as ethnic groups) and the history with their enemies. Volkan’s discussion provided

psychological and political explanations for human insecurity and the challenge faced by many nations and cultures in peacefully coexisting with their ethnically diverse neighbors.

MPA Students Complete Summer Internships

In 2004, nineteen MPA students participated in the internship program. Five of those internships were in non-profit organizations, six were in local governments located in and around central Missouri, four were in the federal government, one in state government, and the remaining three internships were at the University of Missouri-Columbia.

Students worked for the State Department, the Environmental Protection Agency, a consulate representing another government in the U.S., a regional planning commission, and an environmental consulting company. As a part of their internship, students write an extensive analysis of their experience and make a presentation to faculty and students in the fall semester.

For All We Call Mizzou

The University’s comprehensive development campaign, *For All We Call Mizzou*, has now raised \$418 million towards a goal of \$600 million. The campaign has raised money for four major areas: student scholarships, faculty, facilities, and program enhancements.

As the newest of MU’s schools and colleges, the Truman School is still in the very early stages of its fund raising efforts. Achieving our goal of \$10 million would greatly increase our ability to offer scholarships to our very best students, recruit and retain outstanding faculty, and do even more to serve the people of Missouri. While we continue to seek funding from a variety of sources, gifts from alumni and friends make an important difference—both to the campaign goal itself and to the willingness of other donors to contribute to the Truman School. For more information about the Truman School campaign, or make a gift, please contact:

Presentations

Guy B. Adams

Presented, "Administrative Evil and Public Service Ethics: Problems and Prospects," (with Danny L. Balfour) for Plenary Session, Public Service Ethics and the Problem of Evil, Ethics Forum, at the annual meeting of the American Society for Public Administration in Portland, Oregon in March 2004.

Discussant, for a panel on "Developing a Center for Government Ethics," annual meeting of the Association for Practical and Professional Ethics in Cincinnati, Ohio in February 2004.

Christopher Awad

Presented "Managing change. A Changing Communities Workshop," to the Missouri Department of parks and Recreation in Columbia, MO.

Presented "Dilemmas of the internal change agent" to the local chapter of the American Society for Training and Development in Columbia, MO.

Presented "Conflict Management" to the Missouri County Collectors Conference, in Jefferson City, MO.

Presented "Understanding diversity" to the staff of Westminster College, Fulton, MO.

Dana Baker

Presented "Body Politic: Comparative Issue Definition in Autism Related Policy" at the Western Political Science Association Meeting in March 2004.

Presented "Constructing Knowledge Of Nutrition: A Comparative Study On State Nutrition Policies For Children With Disabilities and Chronic Disease" at the Lifespan Development Initiative Poster Session in March 2004.

Kristofer Hagglund

Presented Health policy issues for rehabilitation psychologists at the 6th Annual Conference of Division 22 Rehabilitation Psychology, American Psychological Association, Seattle, WA.

Thomas G. Johnson

Presented "An Overview of American Rural Life," Making Agriculture Productive and Profitable Conference in Dallas Texas on March 1, 2004.

Presented "Land Use Trends in Missouri and Pike County," in Bowling Green, Missouri on February 22, 2004.

Presented "Quality of Life Issues in Rural America," at Taking the Pulse of Rural America in Tucson, Arizona, on January 9, 2004.

Lillard E. Richardson, Jr.

Presented "Testing Formal Models of Direct Democracy" with Anthony Bertelli at the State Politics and Policy Conference in Cuyahoga Falls in April 2004.

Presented "The Impact of Term Limits and Electoral System on Constituency Service by State Legislators" with Christopher A. Cooper at the State Politics and Policy Conference in Cuyahoga Falls OH in April 2004.

Presented "Direct Democracy in the American States: An Analysis of Roll Call Votes" with Anthony Bertelli at the Midwest Political Science Association Meeting in Chicago, IL, in April 2004

Presented "State Regulation of Trucking: The Policy Impact of Differential Speed Limits" with Grant Neely at the Midwest Political Science Association Meeting in Chicago, IL, in April 2004

Presented "American State Legislators in the Internet Age" at the German Online Research Conference in Duisburg, Germany, in March 2004.

Presented "Missouri Case Study: Assessing the Impact of Term Limits" along with David Valentine, and Shannon Stokes, at the Life With Term Limits Conference at the University of Akron in Ohio in April 2004.

Served as a Program Evaluation, External Reviewer, University of Northern Iowa, Master's of Public Policy Degree Program, March 2004.

Served as Panel Chair, "Formal Models of Congress and Agencies," 2004, Midwest Political Science Association.

Discussant, "The Nexus of Information Technology and Substantive Policy," 2004, Midwest Political Science Association.

Charles Sampson

Presented a Roundtable at the 65th Annual ASPA Conference in Portland, OR on March 28 entitled "Merging disciplinary interfaces to explore opportunities for enhanced municipal governance."

Presented "Accounting for Differences in Policy Preferences: Minority Governed Municipalities contrasted with Majority Governed Municipalities" at the Midwest Political Science Conference in Chicago on April 15, 2004.

Elizabeth Scherrer

Conducted a strategic planning session with the Missouri Family Health Council along with Dr. Sheila Watson Bishop, Dr. Lisa Zanetti and Sarah Smith (student) on April 15-16, 2004

James K. Scott

Presented "E the People: Do US Municipal Government Websites Support Public Involvement?" at the Founders Forum at the Annual Meetings of the American Society for Public Administration in Portland, Oregon on March 30, 2004.

Ann Ulmer

Presented a poster, entitled "A Case Study Assessment of the Firms Assisted by the Oklahoma Food and Agricultural Products Research and Technology Center."

Barton Wechsler

Conducted training programs for the Municipal Leadership Program and the Fire Service Executive Leadership Enhancement Program. He has also served as a strategic planning consultant to the College of Education and Human Sciences at the University of Nebraska-Lincoln.

“Politics – good politics – is public service. There is no life occupation in which a man can find a greater opportunity to serve his community or his country.”

– Harry S Truman

Alumni Notes

Rick Childers, MPA '93, is the Executive Director of Pioneer Trails Regional Planning Commission in Concordia, Missouri.

Megan Jarrett, MPA '04 is Training Coordinator at ResCare, for-profit company that provides home and community based services for persons with developmental disabilities in St. Paul, Kansas.

Jacqueline McKim, MPA '03, is working as a Planner and Data Coordinator for the Missouri Department of Elementary and Secondary Education, Division of Special Education in Jefferson City.

Melissa Saddler, MPA '04, was accepted into the U.S. Environmental Protection Agency Intern Program at the EPA Headquarters in Washington, D.C. Melissa will be working as a biologist in the Office of Enforcement and Compliance Assurance (OECA).

Tuck VanDyne, MPA '96, is the new Bureau Chief for the Office on Women's Health in Jefferson City.

Students Honored at Spring Banquet

Above: Students Sarah Smith with Melissa Sadler.

Right: Sarah Courtney, recipient of the Truman School Public Service Award.

Below: Deneke Kuschel with Truman School Professor and associate Director Guy Adams.

Each spring the Truman School of Public Affairs honors its outstanding MPA students at its annual Spring Banquet.

Sarah Smith was this year's recipient of the *Superior Graduate Achievement Award*, which recognizes excellence in graduate studies as well as other aspects of academic life.

The *Stanley Botner Award* was presented to **Deneke Kuschel** and **Tye Parsons**. This award recognizes students who have exhibited strong academic skills, professional integrity and devotion to the art and practice of public administration. Dr. Botner served on the Public Administration faculty for many years and was highly respected in the field for his scholarly work and dedication to public service.

Sarah Courtney received the *Truman School's Public Service Award*. This award is given to a first-year student who has demonstrated a commitment to the ideal of public service, contributed to community life and demonstrated effective leadership.

Pi Alpha Alpha is the national honor society for public affairs and public administration. Pi Alpha Alpha encourages and recognizes outstanding scholarship and accomplishment in public affairs and administration. Its objectives foster integrity, professionalism and effective performance in the conduct of government and related public service activities. In order to become a member, a student must be in the top 20 percent of the class.

This year's initiates were inducted into Pi Alpha Alpha at the Truman School's Annual Spring Banquet. New PAA members include: **Scott Giles, Yungjeong Jang, Megan Jarrett, Corbin Jones, Deneke Kuschel, Amy Latham, John Mahalik, Mariette Marsh, Dawn Matthews, Gina Mauller, David Mitchem, Brad Nelson, Kristen Pape, Tye Parsons, Darin Preis, Michael Reeves, Leslie Robb, Melissa Saddler, Sarah Smith, and Marquita Walker.**
